Swasembada Timur XXV No. 1/A, North Jakarta

In relation to the Business Intelligence / Data Scientist / Data Engineer role I am applying for, I am a Business Intelligence and Analytics professional with hands-on experience in reporting automation, data integration, and dashboard development. While my core strength lies in BI and analytics, I also have practical exposure to data pipeline development and ETL/ELT processes using SQL, Python, BigQuery, dbt, and Airflow to support scalable BI solutions.

WORK EXPERIENCE

PT. Transkom Integrasi Mandiri (Telkomsel Project)

Jakarta, Indonesia

Data Engineer & Reporting Automation, Contract Employee

September 2025 – Present

- Developed real-time dashboards in Power BI, and Excel, enabling daily monthly insights without manual updates.
- Automated end-to-end data pipelines using SQL, Python, Hive, and cronjobs, optimizing MySQL queries for faster, more stable reporting performance.
- Built secure internal web tools (HTML + PHP + MySQL) for streamlined data submission, whitelist processing, access control, OTP verification, and audit logs.
- Implemented automated email reporting (PDF/XLSX), saving 20+ hours weekly and ensuring timely delivery of business-critical metrics.

PT. Transkom Integrasi Mandiri (Telkomsel Project)

Serpong, Indonesia
